Over 35,000 companies trust Transaction Pro

TRANSACTION PRO IMPORTER FOR QUICKBOOKS ELIMINATES DATA ENTRY

Import Transaction or List Data to QuickBooks from Excel, Databases or Text Files

From within the Transaction Pro Importer, you can easily import QuickBooks transactions or lists from any Excel, text file (such as a CSV or tab delimited file), Quicken, MS-Money, Access, or any database that supports ODBC. Easy configurable field level mapping gives you complete flexibility and control in importing your data. Transaction Pro will even enable you to edit your data prior to sending it into QuickBooks.

Save Time By Entering Data Once:

Save time by eliminating duplicate data entry from orders gathered from web sites or other sources.

Want an easy way to import your transactions or lists into QuickBooks? The Transaction Pro Importer is the solution you've been looking for. Wizard interface provides simple step-by-step instructions and field-level mapping of your data. Quickly import data from virtually any source as QuickBooks transactions or lists. Automatically adds new customers, vendors, jobs, items, and classes when importing transactions. Supports Excel, Access, databases or comma, tab, and pipe delimited text formats. Edit existing data before importing to QuickBooks in program grid.
